New academic and theoretical contributions

The thesis has systematized the theoretical basis of the State's financial management mechanism with the Financial Conglomerates. Particularly, the factors influencing the State's financial management mechanism have been analyzed by the thesis, which has enriched the theory of the State's financial management mechanism with the Financial Conglomerates. In practice, the thesis pioneered the theory of financial management successfully used in the finalization of State policy for the emerging Financial Conglomerates in Vietnam.

New proposals drawn from research findings

Some proposals to perfect the State's financial management mechanism with the Financial Conglomerates by the thesis, including:

Begin with the contents of the State's financial management mechanism should be improved: the capital mobilization mechanism; the use of capital management mechanism; the revenue, expenses and distribution of profits management mechanism; the State's financial supervisor mechanism with Financial Conglomerates. In particular, the regulations, policies to encourage green products, environmental protection for sustainable development, ... are focused.

Next, the State's financial management model with the Financial Conglomerates is finalized to focus on the centralized management model and the functional supervision method.

In addition, the support group includes: staffing capacity, who do financial management in ministries should be improved; Information technology, public database system should be invested; Establishing and exchanging information coordination mechanism needs to be finalized; Formation of the Financial Conglomerates should be supported of the State.

Finally, the conditions for implementing solutions on the Finance Conglomerates' side are also presented by the thesis, including: modern technology in database construction should be upgraded; the Financial Conglomerates employees' skills should be improved; Coordination mechanism between parent company and subsidiaries is strengthened; Green Finance Conglomerate model should be thought of.
