5. New conclusions of the thesis

Firstly: Conducting the research systematically on social insurance, social insurance funds and management of social insurance revenues; analyzing more clearly the management of social insurance collection; Building and completing the theoretical basis for social insurance revenue management: The concept, objectives, content, performance indicators, and factors affecting the management of social insurance collection.

Secondly: Conducting the research on social insurance management experience of several countries in the world, thereby, drawing five valuable lessons for Vietnam on the management of social insurance collection.

Thirdly: The thesis uses theoretical and practical basis to analyze and assess the current status of social insurance revenue management in Vietnam for the period 2007-2017. On that basis, the thesis has made appropriate assessments on the current status of research on the aspects: the results achieved, the limitations existed and clearly indicated causes of those limitations.

Fourthly: Proposing systematical solutions to enhance the management of social insurance collection in Vietnam including the following groups of solutions:

Expanding and developing subjects participating in social insurance; completing the base to ensure social insurance payment; management among social insurance collection organizations; limiting the risk of social insurance collection; strengthening the efficiency of inspection and examination on social insurance collection activities.

In addition, the thesis also proposes other groups of solutions: Enhancing the propagation, popularization to upgrade awareness and compliance with social insurance laws; completing and improving the efficiency of the organizational system of social insurance at all levels; organizing the collection of social insurance through tax agencies; application of information technology and administrative reformation; developing a model for calculating the balance of social insurance funds to ensure sustainable social insurance finance; strengthening public relations and international cooperation in social insurance activities. These solutions are built on the basis of theoretical and practical experience in accordance with the guidelines and development direction of Vietnam's Social Insurance.
