

## SUMMARY OF NEW FINDINGS IN THE DOCTORAL THESIS

**1. Thesis topic:** “*Financial policies on support for the growth of SMEs in Vietnam*”

**2. Specialization:** Finance – Banking **Code no.:**9.34.02.01

**3. Full name of PhD student:** Phung Thanh Loan

**4. Full name of Scientific Supervisor:**1. Assoc.Prof.Dr. Duong Dang Chinh  
2. Dr. Vu Dinh Anh

**5. New findings in the doctoral thesis**

*5.1. About the theoretical basis:*

*Firstly*, it is systematized and analyzed theories, concepts and assumptions in order to clarify the theoretical basis of SMEs, to build and improve the theoretical basis of financial policies on support for the growth of SMEs including concept, content, impact and influential factors that affect the financial policies on support for the growth of SMEs.

*Secondly*, it is studied other countries’ implementation of the financial policies on support for the growth of SMEs in order to draw 03 valuable lessons to apply into Vietnam.

*5.2. About the practices:*

*Firstly*, the thesis gave an exhaustive analysis on the current status of the development of SMEs in the period of 2012-2017 according to the following developing criteria: number of enterprises, number of employees in SMEs, capital resources, fixed assets, long-term financial investment, revenue and profit. In term of the current status of financial policies on support for the growth of SMEs, it is mentioned 3 main components: tax policies, credit policies and financial policies on land. As of results of the analysis, it is indicated the achievements, limitations and the causes of these limitations.

*Secondly*, according to the view and objectives of Communist and State to support SMEs, it is suggested the solutions to improve the financial policies on support for the growth of SMEs. There are 4 groups of solutions including solutions to improve tax policies, solutions to improve credit policies, solutions to improve financial policies on land and solutions to enhance the environment for better implementation of the policies. These solutions are both science-based and practice-based solutions so that they are ethical and feasible.
